Volume 17.

THE REDCLIFF REVIEW.

THURSDAY, FEBRUARY 7th, 1920

Number 49

Ratepayers Meeting Held Last Friday

Was Well Attended, As Officials Get Hearty Vite of Taxpayers

There was a fairly good attendance at the postponed ratepayers' meeting held last Friday evening and everything went off nicely.

Mr. A. Mackell was chosen as chairman. After explaining the object of the meeting he called on the Mayor. His Worship explained why the original meeting was postponed. He did not think there was much in connection with the year's business that needed explaining. A ratepayer had had full reports of the meetings in the local press. He thanked the Review for doing this. He also thanked the ratepayers for their forbearance and co-operation during the year. The Mayor stated that by the sale of lots and buildings forfeited to town, about \$9,000 worth of property had been brought back into a tax paying basis. This, he said, was encouraging, and he expressed the hope that more of the men having steady employment here would make it a point to own their own homes. He explained that during the year the council had been able to get the road between here and Medicine Hat graded and they hoped to do something more this year in getting other roads leading to town improved. Mr. Worle said the council had been endeavoring to get eastern manufacturers interested in locating in Redcliff but so far had not met with much success.

Mr. McAfee wanted to know why it was that his offer for a house in town was turned down and the house later thought residents should get the property to a party out of town. He mentioned the Mayor explained that the price the council sold the building in question for was about three times as much as Mr. McAfee's offer.

Councillor Cox as chairman of the Finance committee reported for the department. He said the town had had one of its most successful years in this department, showing a surplus of \$4,158.87. This, he explained, was due to tax coming in much better and the increased number of property owners in town during the past year.

The License and Police dept. had kept well within the estimated expenditure during the year, while the Fire and Lighting and the Sanitary and Relief departments had gone over their estimates. Both the latter were explained by the extra number of fires and the increased number of indigent patients who had to be looked after.

Chairman Mackell thought the council had done remarkably well for the year, as shown by the financial statement. A. N. Collard thought the town should, as soon as possible, have a telephone line from the pump station to the south end of First street as a break there would be a serious handicap to the industries. He suggested council should endeavor to get permission from the Utilities Commission to put in a certain amount each year and that that purpose. The Mayor said there was no more danger from that source at present as the pipe in the main there was in excellent condition.

He then asked what had been done by the council to have the streets in town gravelled. The Mayor said nothing definite along this line had been done yet as council had to get the consent of the Utilities Commission. The matter would probably be taken up by the new council this year.

The School Board

Mr. Laville as chairman of the Board was first called upon. He explained the fact that both the council and the school board had their hands practically tied by the Commission. He said the Board had kept under its approved estimates by slightly over \$40.

High Class Concert Billed For Feb. 12

To Be Given in Cameo Theatre by Mrs. Cooper and Her Talent

The entertainment being put on in the Cameo Theatre on February 12th by Mrs. Cooper promises to be a rare treat for Redcliff people. Mrs. Cooper is being assisted by some of the best talent from Medicine Hat who have a versatile program of humorous and classical selections. Mrs. Cooper, who always captivates an audience with her virgin music, will also take part and will be accompanied by Mrs. Hargrave, Redcliff's popular pianist.

There will also be a play entitled "The Bridal Suite" which is said to be very amusing.

Programs have already been printed and will be sold as admission to the concert. He sure to get one when the tickets call on you.

An head spent only \$27 more than the previous year. The Board was unwilling that another "dollar" should be added to the staff and the inspector had reported the school badly overcrowded. The Board had expressed upon the commission the great need of another teacher but so far had not been able to get its consent to increase the staff. Speaking along the same line, trustee Leamouth said it was not altogether on account of the number of pupils in the school that made another teacher necessary, but rather because several of the rooms had as many as three grades. This, he thought, was not fair either to the pupils or the teachers. In reply to a question about salaries of teachers Mr. Leamouth said that when compared with other town teachers there were if anything, underpaid.

On motion of Messrs. Collard and McAfee a hearty vote of thanks was tendered to the Mayor, Councillors and Trustees for their services during the past year.

Crows Nest Route For Alberta Grain

May Mean Development of Another Through Line to Co. E

Alberta wheat is pouring into Vancouver via the Crow's Nest Pass, Spokane and thence to the Pacific terminals. The U.S. of Grain Commissioners has established temporarily a grain at Mackled to have the grading of the cars.

The drastic shake-up in the handling of the big southern Alberta wheat crop is occasioned by the tie-up on the C. P. R. main line through the loss of a bridge recently near Revelstoke. This announcement is taken as supplying the reason for the recent application of the C. P. R. for a charter for a railway route around the southern end of Kootenay Lake, to cost \$15,000,000.

That the C. P. R. can no longer remain dependent upon one freight route from the prairie to the Pacific grain terminals is indicated, and the development of a southern through route over the low grade Crow's Nest Pass is considered a natural move.

That the C. P. R. can no longer remain dependent upon one freight route from the prairie to the Pacific grain terminals is indicated, and the development of a southern through route over the low grade Crow's Nest Pass is considered a natural move.

Former Redcliff Man Dies At Kimberly

Bert Blatchford, Succumb to Hemorrhage of the Stomach

The Review received word this week from Tom Cha piano announcing the death in Kimberly hospital of "Bert" Blatchford, formerly of Redcliff. Deceased was ill only ten days suffering from hemorrhage of the stomach. An endeavor to save his life a blood transfusion was taken from a friend and eight other friends had volunteered to do the same if necessary.

"Bert," as he was familiarly known here, is well known by many of our citizens. He worked in several of the industries and for a time was one of stewards in the old G. W. V. A. Club.

In his account of his death the Kimberly papers says: "The late Albert Blatchford was in his 45th year and had been a resident of Kimberly for several years in the employ of the employ of the Consolidated as a carpenter. He was very popular with his fellow-workmen and his genial disposition earned him a large circle of friends. He was an active figure in all athletic sports and was at one time manager of the Tunnel football team. Deceased was a returned veteran, having served his country for four years in France, going overseas with the 44th battalion of Winnipeg.

The funeral took place from the United church where impressive services were conducted by Rev. Matheson. The committal obsequies were conducted by the local branch of the Canadian Legion.

Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a. m.

UNITED FINANCE CAMPAIGN
The second United Finance Campaign of the Religious Education Council of Alberta will take place from February 9th to 18th. The objective this year is \$9,800 and the money will be used to promote groups throughout the province, run camps in the summer and many other things for the development of boy and girl life. Youth certificates will be sold next week, and it is hoped that Redcliff will make as generous response as it has done in past years.

All Town Officials Elected By Acclamation

Very Little Interest is Shown By The Ratepayers

Nomination Day last Monday was one of the quietest Redcliff ever seen. Not more than half a dozen ratepayers were interested enough to turn out and see that the required number of candidates were put in the field. If it had not been for the few who did turn out the occasion would have gone by default.

—Messrs

Europe Knows Canada Better

Visitor From Britain Says Investors See Dominion As Worth While

"Every year there is a new intelligent conception of Canada in the minds of the people, not only of the British Isles, but of the European countries in general," said C. J. Smith, European Vice-President of the Canadian National Railway, who is visiting Canada, for the first time in two years, to discuss with the Canadian National officials as well as with officers of the shipping organizations with which the Canadian National has its traffic connections. He will visit the company's territory both in Canada and in the United States.

Mr. Smith said it would surprise Canadians to learn how well the principal characteristics of Canada were now understood abroad. "The visit of Sir Henry Thornton to Europe during the past year, brought Canada to the front as never before, and people at present are extremely receptive of the prosperity which exists in this Dominion and the opportunities available for investment here."

"There is no chance of the interest in Canada diminishing. The activities of the leading British financial men, such as Lord Melchett and other leaders in mineral and industrial fields of development, are having their effect of assuring the European investor that Canada is really worth while and is likely to become more so."

"Speaking of the traffic and business outlook as between Canada and the British Isles and other European countries, Mr. Smith stated that the work of the Canadian National system in developing both trade and travel, emigration and settlement, was being constantly extended over Europe. During last year, he said, the Canadian National had handled more new settlers into Western Canada than ever before, representing an increase of 58 per cent. over the figures for the preceding year. "In addition to this growing emigration traffic, there is a constant growth in the freight handled by our system between Canada and Europe in both directions, and there is also a healthy growth in the tourist trade. The Canadian National is represented in virtually every European country today, though in the matter of attempting to provide satisfactory settlers for the vacant lands of this Dominion, our efforts are chiefly confined to securing British and Nordic people generally, and getting for Canada those immigrants who are likely to become good Canadian agriculturists."

"The Canadian railways," Mr. Smith continued, "are considered models of efficiency in operation, not only in Great Britain, but in other European countries, several of which, including France, are preparing to send groups of experts over here to study at first hand the principles followed in the management and operation of the Canadian systems."

"The launching and placing in service of the five new vessels of the Canadian National Steamships for the Canada-West Indies trade development had aroused keen interest throughout Britain," Mr. Smith said, and it had demonstrated that Canada desired to develop facilities for the encouragement of her trade within the empire, and also that the Dominion was keen to take advantage of all opportunities offering for improving her position."

Production Of Canned Foods

The development in the production of canned foods in Canada has shown a remarkable expansion since the beginning of this century. The principal commodities thus preserved are fish, fruits, vegetables, milk, and meats. The industry constitutes an important market for the tin, wooden box, paper, and printing trades.

Yes, I've just bought her a 1930 motor car!"

Choosing Flowers For The Garden

The Right Varieties To Cultivate With Hope Of Success

With the lengthening of the days and arrival in many homes of the seed catalogues, there comes thoughts of gardening. When going through the attractive seed catalogues the avid flower grower would like to add to his garden across so that he may be able to grow many of the beautiful plants pictured and described. When one cannot extend his garden boundary it becomes a question as to the kinds of flowers and the varieties of them that one may grow with some hope of success. The booklet "Annual Flowers," issued by the Department of Agriculture, at Ottawa, is of great assistance to the flower grower, simplifying the selections to be made when ordering or planting the seed. This booklet, Bulletin No. 60, which has been written by Miss Isabelle Preston, specialist in ornamental horticulture, at the experimental farm, and available at the Publications Branch of the Department, gives hints on the starting of annual flowers, the seed and in growing them during the summer. It also contains a very long list of varieties of annuals that have been tested at the experimental farm, most of them during many successive seasons. Many of the flowers are listed in the booklet, grouped as to the colour, characteristics, and season of blooming.

A Queer German Law

No Come Back After Six Weeks If

Ma Declared Dead In Error
In Germany, where you have been declared dead in error, you must protest that you are alive within six weeks of the date of mistake or remain dead for ever after. This singular law is responsible for the fact that a soldier named Wohke, who was declared dead by a judicial decision in 1912, is unable to enjoy the possession of his own property, which was bequeathed to him. Since the end of the war Herr Wohke has been trying to "come alive," but the authorities say they cannot do anything about it; he is legally dead, and they cannot, after so many years, resurrect him. The only Government department that has given him any satisfaction, if it can be called satisfaction, is the income tax office, which has been willing to receive his taxes regularly. Seaman Wohke has appealed to the Reichstag, and the Deputy, Herr Hiedemann, has accepted himself with the matter, but without success. It is suggested that Herr Wohke might succeed in recovering his status if he committed murder. A dead man cannot kill a live man; therefore, Wohke must be alive.

Educational Ares Allies

System Differ But All Have One Aim Says Hon. Vincent Massey

The realities of international affairs are nowhere better understood than in the realm of education. Hon. Vincent Massey, Canadian Minister at Washington, told the Association of American Colleges at Chattanooga, Tenn., adding that in the realm of the mind there can be no disharmony between communities.

"The educational systems of different countries may differ," he said, "but it is the habit of educationalists to regard themselves less as rivals than as allies in common cause." He spoke in praise of the purely collegiate institute, peculiar to the English speaking world, created "that youth might be fitted for public employment both in church and state."

Reparations and Debt

The New York Times says: "Our Government has consistently argued that German reparations do not concern the United States, and have no relation whatever to the war debt owed to our treasury by England, France and the others. This contention is, of course, legally correct. It may also be mathematically. In the documents on the treasury books, reparations are distinct from the war debt. Yet everybody knows that, in fact, they are linked together and cannot in the final settlement be kept apart."

Forms Northern Link

The "Horn-Whindermere Highway is the final, and northern link in the great Grand Circle Tour. This route covers approximately 1,000 miles through Canada and the western United States, touching sixteen national parks, four in Canada and twelve in the United States."

Have you stopped your wife from buying 'things'?

Yes, I've just bought her a 1930 motor car!"

Corn For Poultry

Should Be Cracked and Scattered Through Litter As Scratch Food

Whenever a mixture of grain containing whole corn is thrown to a flock of hens it will be seen that the corn will be quickly picked up by the birds in preference to the other grains. Unless one desires to fatten his birds quickly, corn, if fed at all, should be cracked and scattered in the litter so as to induce the exercise of scratching.

"Yellow corn is better than white because it contains fat-soluble vitamin 'A,' which is not present in the white. There is little or no difference to the feeding values of flint and dent corns."

Corn is rich in carbohydrates, and may be more freely used during the winter. The new edition of Bulletin No. 1, of the Department of Agriculture, at Ottawa, "Poultry Feeds and Feeding," points out the tendency of a wet mash containing corn meat-suet to spoil if kept too long.

A New Occupation

"Airport Greeter" Is Title Of Texas University Student

"Airport Greeter" is a new occupation. It does not necessarily require a college education but the first to follow the profession is a University of Texas student, line captain of the Longhorn football team, winner of the 1928 Southwest Conference title.

"Chadman" the Sewell will greet the air arrivals at the Port Worth flying field. He is an airplane stunt pilot; kept a vacation touring Europe by bicycle and writes a sport column for six Texas newspapers.

World Vote On War

A plan under which a war of aggression would not be waged by the United States until its declaration was ratified by a majority of the voters of the country was submitted to Congress by Representative Hamilton Fish, Jr., Republican, New York.

New Housemaid: "We took things pretty easy at my last place." Cook: "Well, you can't here. They keep everything locked up."

War Medals Unclaimed

Not Only For World War But For Earlier Conflicts

A total of 61,000 Canadians left their lives either during the great war or died subsequently from causes directly attributed to war service. It is disclosed in the figures of plaques and scrolls that have already been issued from the department of national defence to the next-of-kin of the nation's fatal war casualties. It is more than ten years since hostilities ceased, yet many of those plaques remain unused, while thousands of war medals continue to reposit in the department unclaimed. This situation is not peculiar alone to the great war, of 11,900 Canadian service medals not yet delivered to their owners about 10,000 are for the Fenian raids of 1856 and 1870, and for the Red River rebellion of 1870. It is pointed out by G. J. Deshaies, deputy minister of national defence, that only those who received the bounty in connection with the Fenian raids are entitled also to the medal.

Feeding Hogs Is a Science

Success Assured If Supply Of Mineral Mixture Kept On Hand

Although the pig may not know it, a leading authority by the Ohio experiment station, he must have sodium, chlorine, calcium and phosphorus, if he is going to make good growing and return his owner a profit. For this reason many farmers keep a supply of mineral mixture.

Common salt supplies sodium and chlorine. Finely ground limestone or hardwood ashes furnishes calcium, while steamed bone meal provides phosphorus. This mixture, containing equal parts of gail, finely-ground agricultural lime and bone meal is widely used for cattle, as well for hogs. It cures the habit developed by many cows, of chewing bones and boards, acquired because the mineral content of their rations required supplement.

The ancient Egyptian priests preserved a rigid celibacy.

ALBERTA WHEAT POOL ELEVATORS

Alberta Pool Elevator Points

— LEGEND —
Elevators Points
Export Points
Canadian National Railway Lines

The above map shows the program made by the Alberta Wheat Pool in building country elevators during the past three years. In the fall of 1925, three country elevators were in operation. With the close of the year 1928, the number of these elevators had increased to 220. Furthermore the elevator system has been paid for as built. The capital was provided for the building of this elevator system was provided for by annual deductions

of 2 cents a bushel on all wheat handled. In three years the elevator reserve has reached the total of \$2,000,000. The Alberta Wheat elevator system handled 27½ million bushels from the 1927 crop, or 28.5 per cent of the total pool handling. This year the elevator has already handled over 30,000,000 bushels, and hopes to handle close to 60 per cent of all wheat delivered to the Alberta Pool. The location of pool elevators is

Harnessing Canada Water-Power Resources

Report Shows 5,523,000 Horse-Power Now In Operation

With world interest centred upon the efforts being put forth in almost every civilized country to secure additional supplies of low-priced power for the needs of industry, the annual review of hydro-electric progress in Canada by Hon. Charles Stewart, Minister of the Interior, is of timely significance, indicating as it does, that throughout the Dominion the greatest activity prevails in harnessing for industrial, commercial and domestic use the advantageously situated and ample water-power resources of the country.

During the year 1928 the energy of the waterwheels or turbines actually installed and brought into operation amounted to 550,000 horse-power, thus bringing the total for the whole Dominion to 5,523,000 horse-power. In addition to this large increase, there are many projects under active construction, some of them nearing completion and others just recently initiated, whose combined installations will result in adding more than 1,200,000 h.p. to the country's total. There are also many projects of construction in the earlier stages, some of which will undoubtedly be undertaken in the near future—Bogota Field Post.

Not His Responsibility

A Scotch widow who had lost her husband in a railroad accident seemed in getting two of her fellow countrymen to agree to bring up her child in case she died when it was born.

It happened that the mother died giving birth to twins. One of the Scotchmen was away at the time, but he received the following telegram from his friend who had joined in the premises: "Twins born today. Mother dead. My twin also."

A Silencer

Young Lady — I want a bow, please.

Smart Young Clerk—I'm at your service.

Young Lady (eying him closely)—But I want a white one—not a green one.

Kingings Is No Sinecure

Ruler's Life Is a Busy One Says Famous Portrait Painter

It is disclosed that there is a portrait of King George painted just before his recent illness which has not yet been seen by the public. Frank P. Salisbury, who painted it, depicts the King taking the traditional gift of gold and silver to the poor during the installation ceremony of the Knights of the Honorable Order of the Bath. The scene, which has never before been painted, glows with color. It was sketched by the artist, who is well known for his representations of historical subjects, and later the various personages who figure in it came individually to sit for their portraits.

When King George arrived at Mr. Salisbury's studio the enormous canvas was complete except for his own picture. When the King's painter began to laugh: "My nephew," he said, "You have painted me in an admiral's uniform and have given me a Field Marshal's sword. You didn't think I would notice a little detail like that, did you?"

To remedy matters, the King sent to the artist a letter saying: "You have painted me in an admiral's uniform and have given me a Field Marshal's sword. You didn't think I would notice a little detail like that, did you?"

Just how busy a man King George has been all his life might be gathered from Mr. Salisbury's reminiscences.

"So far as I have observed," he said today, "Kingings is no sinecure. I received an appointment for the first sitting for a year portrait of His Majesty for noon one day. I went at 11 o'clock, and during the next hour watched the King discuss the matter with the King's physician, shake each other by the hand and with gracious words and gestures make a number of serious young lords happy."

"He looked so happy that morning, and had arisen at 7 o'clock to accomplish his duties."

"At noon he sat for his portrait, which is hard work even when one is fresh. As I was leaving, he said, 'I have not been fair to you, I am afraid, because I am sure I have shown signs of drowsiness a number of times.' At that period the King had not had more than two weeks' vacation in five years."

"The Prince of Wales was an extraordinarily busy man. He was to sit for me at 5 o'clock one afternoon. He motored all morning to the south of England to perform some public function. In the afternoon, without any lunch, he motored to Amherst, where he reviewed the troops. Precisely at 5 o'clock he arrived at my studio in London, weary but still with much to do. He had to deliver an important address, before a distinguished gathering at dinner. He had his speech with him and asked me if I would mind if he ran over it during the sitting."

"While I painted, the Prince studied his speech, and at 6 o'clock he left to prepare himself for the evening."

Did Not Sound So Good
"I don't know whether to accept this testimonial or not," mused the hair-restorer man.

"What's the matter with it?" demanded the advertising manager. "Well," explained the boss, "the man writes: 'I used to have three bald spots on the top of my head, but since using a bottle of your hair restorer, I have only one.'"

Production Of Cobalt

The world's output of cobalt metal and salts is now controlled by African and Canadian producers, and is so, to a large extent, controlled the available raw materials.

Foster: "What are you doing here?"
Foster: "Parson use, I am a home-pannelist."
Foster: "I don't care what your religion is, but you are not allowed to wander about the corridors of your parish."—Lustige Kolke! Zeitung, Cologne.

MAGIC BAKING POWDER

TORONTO, CAN.

Proposed New Air Service

If Plan Carried, Old Plane Will Serve Great Slave Lake Region

Waterways, the end of steel of the Alberta and Great Waterways Railroad may be the starting point of a regular weekly service that will be operated into the Great Slave to Fort Simpson, 1,000 miles north of Edmonton.

The dog that used to carry the mail, freight and passengers up that way have laid down on the job, so we have to go up and give them a good "canoe," states Pilot Dyer. "We are going to freight in goods, carry the mail and any passengers to this country. We will do in five hours and comfort and it takes the dog team nearly a month of hard, cold traveling to cover the country." He estimates that the same as which Capt. Wilcox, the explorer, met with his rights before journeying over the top of the World.

The new service will be operated every Friday to Fort Simpson. The plane is a Super Universal, which will carry five passengers, making stops at all intermediate points, i.e., Medicine and Weidens. The service will be operated between Waterways and Fort Resolution on Great Slave Lake.

The schedule calls for stops at Port Chipewyan, Pilgrimage or South Port Resolution, Hay River, Port Providence and Fort Simpson. The machines piloted by Dyer will be the only one in operation, according to present plans.

Meeting With Success

Calgary Airways Plan Discovered

After operating for only six months the Calgary Western Airways Limited, of Calgary, has declared a dividend of seven per cent. During the period 1,000 passengers were carried, 22,000 miles, 2,200 square miles were explored from the air, 600 square miles were photographed, 28 students were sent flying instruction, and the course of an oil structure was followed from the air. There were no accidents in which passengers were injured.

Canada's Historic Sites.
The Historic Sites and Monument Board of Canada, is composed of historical authorities, and one of its duties is to recommend to the Department of the Interior, historic sites worthy of being marked, restored, or preserved. The board meets annually to consider the various sites brought to their notice and forwards its opinion to the Department of the Interior which makes the final decision and carries out the work through the National Parks of Canada Branch.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been overstimulated, and food moves too fast. The secret is in an alkali, which neutralizes excess acid. It is the best alkali known to medical science in Phillips' Milk of Magnesia. It has no harmful effects. It has been used by the standard with physicians in use for years since its invention. One spoonful of this preparation

Employment Situation in Canada Improved

Report For 1928 Better Than Any Year

The employment situation throughout Canada was decidedly more favorable in 1928 than in any other year of record, nearly all localities and industries showing in the general improvement. From early in January until the first of August there was almost uninterrupted expansion on a larger scale than in other years for which data are available. The upward movement which carried the curve of employment to a level many points higher than in any of the eight preceding years, resulted in a gain between January and August of over 100,000 persons in the staffs of the firms co-operating with the Dominion Bureau of Statistics.

The Bureau tabulated payroll data from some six thousand firms who employed a monthly average of 928,580 workers during 1928, their statistics varying between 58,724 on January 1, and 1,003,085 at the beginning of August. As in 1927 and 1928 an outstanding feature of the situation during 1928 was the marked expansion in construction.

Telling About Your Troubles

People With Minor Ills Take Pleasure In Talking About Them

"There is no surer way to make a lifelong friend than to attend people who tell you how it was. All dealers in professional friendliness know that. Disraeli used to greet old Tory gentlemen whom he should have remembered but could not place with 'And how is the old comrade?' They all find out, and they like to tell you how it was. Occasionally one finds alling acquaintances who really have something mysterious and unusual the matter with them. They should be given the floor, after recovery. Like a returned traveler, they may have fascinating story to tell—New York Times.

Britain's Increasing Population

Migration Will Not Help Greatly To Solve The Problem

The movement of even 50,000 or 70,000 people a year from Great Britain to Canada is of course helpful to the old country and to the Dominion, as well. But the point is that even if this immigration were multiplied by two or three, Britain's population would not be reduced. It would not even remain at the present level. It would continue to grow. Therefore it would be well if people on both sides of the Atlantic gave up regarding immigration as a cure-all for the economic problems of Great Britain. At best it is a mild palliative—Statistical Bureau.

Shelter Belts Help West

Twenty-five years ago one could drive for miles through the farming districts of the Prairie Provinces and seldom see a good farm place. But the advent of the shelter belt has gradually worked a great change in conditions. Last season an inspection of some 7,600 farms in which shelter belts had been established as a result of the tree planting campaign carried on since 1901 by the Tree Planting Division of the Forest Service, Department of the Interior, showed 6,800 farms with good vegetable gardens. Two thousand, seven hundred were growing small fruits and about 600 were experimenting with apples or plums, or both.

One million, four hundred and ninety thousand, three hundred and forty acres supplied milk to creameries in Canada during 1928.

COUGHS

are Nature's signals warning that resistance is broken and the body undernourished.

Scott's Emulsion

is a blessing to all who need strength. It helps keep the body vigorous and healthful.

Scott's Emulsion, Toronto, Ont., 1928

Success In Turkey Raising

Man From England Does Well With Turkeys In British Columbia

Two years after Jesse Throssell went to British Columbia from Bedfordshire, England, he was styled the "Turkey King of the Fraser Valley," a fertile farming country near Vancouver. In the spring of 1927, a few months after his arrival on the farm he bought in the Fraser Valley, Mr. Throssell sent to England for two pure bred turkeys and one tom turkey, and with this nucleus he raised a flock of seventy birds that year. In the autumn of 1928 he had between 500 and 600 turkeys ready for the market. He exhibited at the Vancouver Winter Fair in 1929 winning the principal prizes in all the classes which he entered, including gold medal and first prize for the best turkey and first prize and special for best pair. He also won in the "dressed turkey" class, six dressed turkeys which weighed a total of 155 pounds were put up in auction and sold to the Lieutenant-Governor of British Columbia for \$187.80. For the best bird of the lot the Lieutenant-Governor paid \$40.00. It weighed twenty-one pounds. Mr. Throssell recently shipped a number of turkeys to Australia for breeding purposes. His birds now command the highest prices. He estimates that his 1929 flock will return him about \$5,000.

Mr. Throssell's success has been so enormous that he has induced his brother to come out from England and settle on an adjoining ranch, and the two will work together to develop and extend the turkey raising enterprise.

Royal Bank Promotions

Announcement of Changes Has Been Made By Head Office

The head office of the Royal Bank has announced the following promotions:

S. A. Duke has been appointed assistant supervisor of Ontario branches with headquarters at Toronto.

B. L. Mitchell, manager at Vancouver, for the last three years has been appointed manager of the Toronto branch.

A. T. Lowe at Calgary will succeed Mr. Mitchell at Vancouver and F. W. W. at Edmonton, goes to Calgary. M. A. Allingham, assistant manager at Vancouver, takes over the Edmonton branch.

Manitoba's Fine Building Marble

Manitoba, which has already acquired a reputation for fine building stone through the Treadwell limestone used in public buildings throughout Canada, including the interior trimming of the Parliament Buildings at Ottawa, has added marble to its products.

The new marble quarry is near Cormorant Lake, 29 miles north-east of The Pas, on the Hudson Bay railway, and several quarries have already been shipped.

Canada's Motor Vehicle Exports

The sum never sent on made-in-Canada motor vehicles, Canadian cars and trucks are exported to 50 countries, and Canadian automotive exports exceed in value, by a wide margin, the exports of other mechanical products from this country.

Manufactured products, other than one of two dependent, on the exportation of natural resources, rival, let alone exceed, those of the automotive industry in exports.

Minors' Disinfectant For Coughs and Colds

"Your girl is a blonde, eh? Must be natural?"

"What do you mean by blonde?"

"One who dies by her own hand."

Heist— "You get your wife to try the budget system, Jewett—No; she won't leave."

Sixteen hundred different minor details Milwaukee, according to police survey.

W. N. U. 1740

Quality Of Canadian Goods Has Improved

Research And Skilled Labor Have Brought Big Factors

The quality of Canadian products is steadily improving, with greater knowledge of research, scientific methods, processes, application of skilled labor and the needs of buyers. In the face of mass production competition, Canadian producers are seeking to hold their place by giving special service, better quality or distinctive features to their products. That they are succeeding is proved by the fact that Canadian manufactures are exported to over a hundred countries, while supplying the greatest part of domestic needs. A still greater share of the home market would result in more production, more employment, and more exporting, and it is therefore important that home industry should be encouraged by stabilization and other necessary measures as much as possible.

Recipes For This Week

(By Betty Barclay)

RICE AND SALMON SALAD

Take equal parts of salmon and cold boiled rice, slice a few hard-boiled eggs, and chop finely. Mix all the fish and rice are thoroughly mixed. Pour into a salad dish and cover the whole with mayonnaise or boiled dressing.

Canoe team left, left-over chicken, mutton, ham, or vegetables can be used in the same manner—always use equal quantity of rice. The addition of celery and hard-boiled eggs make a more elaborate dish.

SANDWICH FILLING

One pound of minced meat (be careful to keep small particles of shell from clinging to the meat) is one seedless raisins. Grind together in a food grinder add a little salt and the juice of one small orange. Work together very thoroughly in a glass container and keep in a cool place. Can be used between thin, well buttered slices of whole wheat, white or bran bread, ideal for school lunches, workmen's lunches or picnics.

Already Advised

An "accident" case, in which the patient was suffering from a wound in the head, was taken to hospital. After taking the usual precautions to stop the bleeding, the official said: "Now, don't worry, you shall take immediate steps to ensure your wife being advised of your detention here, and so save her from anxiety." To which the patient resignedly replied: "She did it, Miss!"

Honey production in British Columbia in 1928 is valued at \$216,350, according to \$100,000. This year in 1923 it was \$12,132.

More than half of the known elements are liquids—about 20 in all.

Your best move, Smoke GLEN'S CUT PLUG

SAVE THE VALUABLE "POKER HANDS"

Congress of Nurses

Delegates Coming To Montreal Convention From Many Lands

For the international Congress of Nurses, to be held in Montreal, in July, acceptances have been received from the following countries to date: Great Britain, United States, Australia, New Zealand, Hawaii, India, South Africa, Irish Free State, France, Belgium, Germany, Switzerland, Spain, Italy, Bulgaria, Austria, Poland, Greece, Turkey, Yugoslavia, Czechoslovakia, Latvia, Estonia, Sweden, Norway, Holland, Denmark, Finland, Cuba, Java, Philippines, Iceland, Brazil, Ecuador, Argentina, Chile, China, Japan, Korea, and Syria.

Trappers Use Airplanes

Bring Furs From North Country To Winnipeg By Modern Methods

For the first time in history, an airplane has been carrying furs from the wilds of northern Manitoba to the Winnipeg market. Hollick Kenyon, veteran fur trader, Portage, for the Winnipeg settlement the other day, taking Ed Symonds, veteran trapper, whose aim was to test all competitors, who take a month to travel by dog team.

Butler, "An, darling, let's be married soon." "I don't know how to propose."

Phil Adams: "Sure. Let's make it last week. I've never been married in January before."

Little Helps For This Week

"As we have therefore opportunity, let us use the good unto all men."

Meaning: Let the occasion, by the forelock take.

That noble power, the never-failing time.

Lost a more moment's putting off should make.

Mischievous almost as heavy as a crime.

—William Wordsworth.

It is decreed in the providence of God that although the opportunities for doing good, which are in the power of every man, are beyond count or knowledge, yet the opportunity never neglected, to man by any self-sacrifice can atone for those who have failed or suffered by his negligence.—Julian, Horatio King.

Early Tom: George (nervously): "I'd like best to all the world, Rose, to marry you, but I don't know how to propose."

Rose (promptly and practically): "That's all right, George, you're fitted with one. Now go to father."

Actor: "I say, you know I'm getting awfully popular." I see some telephone people have named a new cigar after me.

Manager: "Oh! Well, I hope it'll draw better than you do!"

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal benefactor and germ destroyer, as well as stimulant and invigorant. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that, by using glass we are actually excluding those vital health-giving rays. Therefore, the invention of **WINDOLITE** is a discovery of long-felt want. Extensive experiments have conclusively proved that it is an effective substitute for glass, that it freely admits Ultra-Violet rays, and that its use has most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthily light instead of darkness in the stable.

Indeed, the discovery of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, improved the health of cattle and is now being used in domestic and industrial requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light last through windows for cattle sheds, dairy stables, poultry houses, brooders and out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is being successfully used for greenhouses, verandas, schools, factories, hospitals, sanatoriums, hot beds, plant covering and greenhouses. It is made of plastic and will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 14 lbs. while a square yard of glass of ordinary thickness weighs about 140 lbs. The improved **WINDOLITE** requires no varnish.

Price \$1.50 Per Square Yard, Exch. Toronto.

Use **WINDOLITE** and let

E. J. HUNT
C/O 4th St. Medicine Hat

J. Lawrence had the misfortune to
break two of his ribs in an accident at
an Erick & Co. restaurant Tuesday.

St. Ambrose church intends putting
on a social in the Parish Hall on
Tuesday evening. Watch for
other particulars later.

Word was received here, from this
week announcing the death of the
year old son of Mr. and Mrs. Joseph
Dutton, of Edmonton, formerly of
Redcliff.

Mrs. Jackson, of High River, Mrs.
Parsons, of Calgary, and Mrs. Wilson
(Edmonton, Man., who since the
death of their daughter have been with
Mrs. father, W. H. Watson, respec-
tively, arrived in Redcliff.

A. E. Smith arrived word this week
informing him of the death of John
Garner, of Calgary. Mrs. Johnson, a
daughter of deceased, was a relative
of the late Mrs. Smith and frequently
visited her here.

Samford Kalsland, son of Mr. and
Mrs. Hans Kalsland, was taken to the
Medicine Hat hospital last Thursday
night to undergo an operation for ap-
pendicitis. He was in a serious con-
dition but is now progressing nicely.

A number of young people enjoyed
an evening of entertainment at the
Medicine Hat hospital last Thursday
night. The young people who were
there since some of them have been
suffering sprained ankles, sore throats,
bitten tongues, loose teeth and broken
bones. Nothing serious, however.

**NOTICE
TO CAR OWNERS OF REDCLIFF
AND DISTRICT**

**billiards
for
Steady Nerves**

THE Artist that drew
this picture always
plays billiards before he
draws. This practice
inevitably makes his
hand steady and sure.
If you're a case of nerves,
or if things haven't been
going right, there's only
one cure—a game of
billiards on Brunswick
equipment in our Recrea-
tion Room.

TAKE NOTICE

RUMELY TRACTOR SCHOOL

This is a personal invitation to
YOU to attend our Rumely Power Farm-
ing School to be held in the

Empress Theatre, Medicine Hat,
on

Friday, February 15th, 1929

This school lasts all day, With a
Morning, Afternoon And Evening
session and is absolutely free to all
who may be interested.

It will prove a wonderful day of
entertainment and instruction in
modern and up-to-date methods of
farming.

From an entertainment standpoint
it is good and our prophesy is that
it will be a day well spent and long
remembered.

You may win a prize—Who knows?
